WHY ARE YOU HERE?

IDEAS FOR SOME DRAWINGS ABOVE CAME FROM THE MIND OF STEVE VOGEL

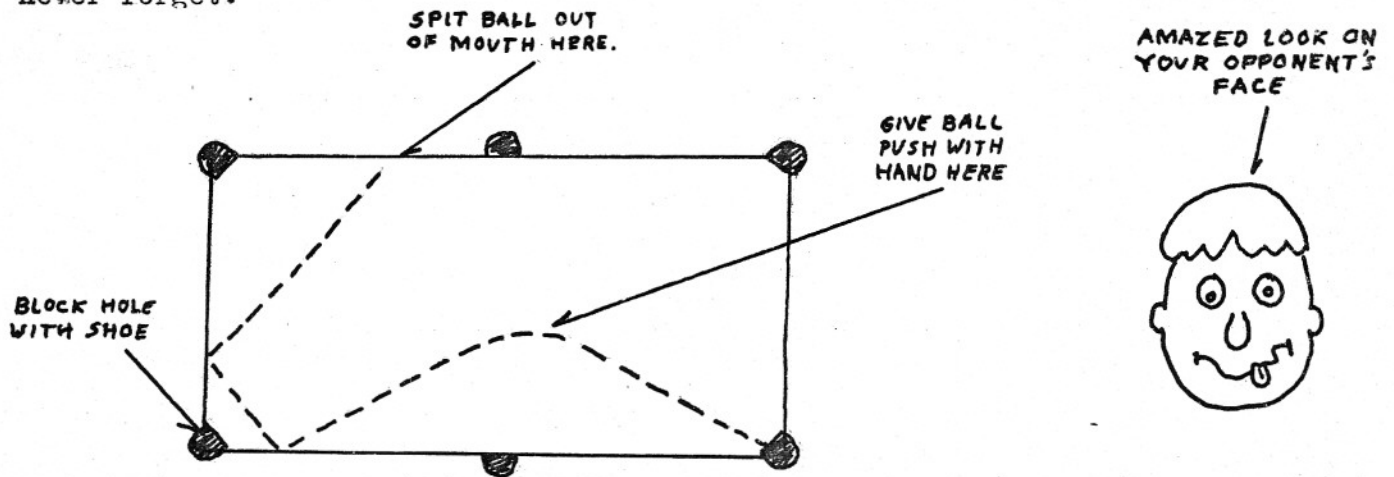

STEVE KAST'S RULES FOR POOL

Pool is an ancient game dating back to 1969 when I discovered it in a pool hall in Bromo California.

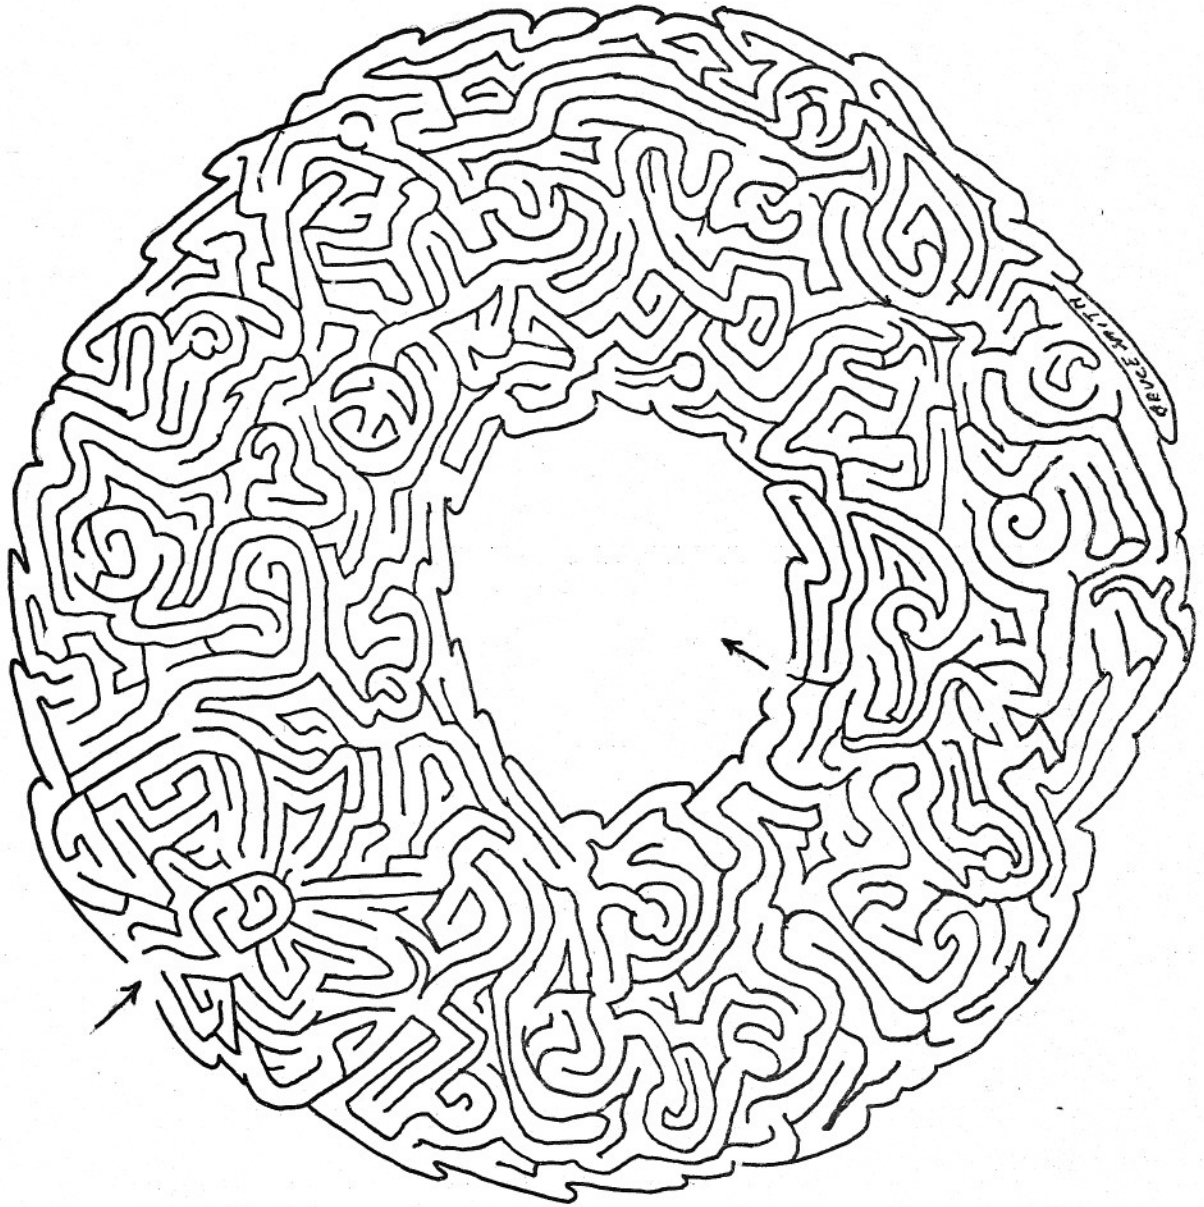

Equipment: In the game of pool you use fifteen balls and the cute ball, which looks like a solidified snowball. You also use a ping pong table without the net, and with six pockets on the sides and corners. These pockets are to catch the balls in and they also serve as a good place to keep your pet hamster. The most important piece of equipment in the game is the cute stick, which you can use to hit your opponent with if you are losing the game.

How to play: The object of the game is to win. One of the most basic rules is do not cheat. When I play the game I always try to hit the cute ball into one of the pockets, because that way you get back any balls that you might have lost earlier in the game. If you get tired of the game, just try to hit the little black balls into one of the pockets. If at the end of the game, you have not won by following my instructions, just yell and scream and noone will ever want to play against you again.

Trick shots: Here is a trick shot you can do that your friends will never forget:

One last word of advice: When you are invited over to someones house to play pool, always remember to wear a swim suit. This will help to confuse your opponent.

DIAGRAM OF BRUCE'S HEAD.

THINK ABOUT IT

This letter was delivered to me, (Bruce), by my sister Elaine:

Sir,

Just a note  to tell you how overjoyed I was to receive the last issue of Bruce's Fanzine.

The article entitled "Think about it" was the most incredible thing I have ever read. Absolutely mind boggling.

There is only one thing I feel you left out. I do hope you will cover it in your next issue.

What is an armadillo?!?!?

Sincerely

Nurse Jane Fuzzy Wuzzy

Daze Funny Farm

12 uh uh Creekbank Trail

High River, Ca.

To answer the question that was posed by Nurse Jane Fuzzy Wuzzy, I shall continue my article on the important statement, "Armadillos are not purple"

"What is an armadillo?" you may ask. Well, an armadillo is an animal of the mammal class, of the order edenta, and of the family dasypodidae.

Many armadillos are nocturnal. That means that they are awake during the night. I have suggested to the National Geographic Society that they feed them Sleep-Eze. For some reason, they did not like my idea. Anyway, not all armadillos are nocturnal.

There are many types of armadillos. They have many different types of diets. They have many different eating habits. They eat many different kinds of food. They also live in many different places. They inhabit many different regions. They reside in many different locations. They also protect themselves in many different ways. They keep themselves from getting hurt in many different ways. They defend themselves from harm in many different ways. There are many different things about armadillos.

TO BE CONTINUED.

NOW THAT YOU HAVE READ THIS ISSUE OF BRUCE'S FANZINE,
PUT A CHECK BY THE PICTURE THAT BEST REFLECTS YOUR
FEELINGS.

WHAT?

WHY AM I HERE?

DUH!

GEE.
